## Projects

### Github Followers App, Github Follower Tracker

- This is a GitHub Followers app built with Swift and UIKit. It uses GitHub's REST API to fetch and display followers of any GitHub user. The app provides a clean and simple interface to search users, view follower lists, and explore detailed profiles effortlessly.

### CryptoTracker, Crypto Tracker Application

- This is a Crypto Tracker app built with SwiftUI, using Swift Package Manager (SPM) and the CoinGecko REST API. It lets users track cryptocurrency prices, trends, and market data in real-time with a sleek and modern interface. Perfect for staying updated on the crypto market easily and efficiently.

### Rick And Morty App

- This is an iOS app based on the Rick and Morty series, built using Swift and UIKit with the MVVM architecture. It fetches character, episode, and location data from a REST API and presents it in a clean and organized interface. Perfect for fans who want to explore the world of Rick and Morty in an interactive way!

### Scrumdinger, Scrum Track Application

- This is a Scrum management app for companies, built using SwiftUI. It helps teams plan, track, and manage their sprints with an intuitive and modern interface. The app simplifies collaboration, offering tools for creating tasks, monitoring progress, and improving workflow efficiency, all in one place.

### Spotify Clone

- This is a Spotify clone app built with Swift and UIKit, utilizing Spotify's REST API for authentication and music data. The app allows users to log in, browse playlists, search for songs and artists, and enjoy a seamless music experience with a modern and intuitive design.

### Netflix Clone

- This is a Netflix clone app built using Swift and UIKit. It uses a REST API to fetch and display movies, TV shows, and their details. The app features a modern design, smooth navigation, and options to browse categories, search for content, and view trailers, giving users a Netflix-like experience.

### Pokedex, iOS Application for Pokemons.

- This is an iOS Pokédex app built using Swift and UIKit. It connects to a REST API to fetch and display detailed information about Pokémon. The app is designed to be easy to use, letting you explore Pokémon with a clean and simple interface. Perfect for fans who want quick access to Pokémon data.

## Profile

A Junior iOS Developer with experience in building apps using Swift and SwiftUI. I have a good understanding of iOS frameworks, REST APIs, and design principles. I am also skilled in using Swift Package Manager (SPM) to manage dependencies and integrate third-party libraries, and creating user friendly interfaces. I enjoy solving problems and writing clean, efficient code to create high-quality apps.

## Professional Experience

### iOS Developer, VitoLabs

- Responsible for developing mobile applications.
- Used Swift and SwiftUI.

2024 Nov – present  
Antalya, Türkiye

### Backend Developer Intern, Manisa Su ve Kanalizasyon İdaresi Genel Müdürlüğü

- 30 days of mandatory internship.
- I have focused on BackEnd development using ASP.NET

2024 Jul – 2024 Sep  
Manisa, Türkiye

**Receptionist, Arya Veterinary Clinic**

- Temporarily worked as a receptionist.

2023 Mar – 2023 Jun  
Manisa, Türkiye

**Intern, Teknodev Yazılım ve Bilişim Hizmetleri A.Ş.**

- 30 days of mandatory internship.
- I have focused on game development with Unity using C#.

2023 Jul – 2023 Aug  
Antalya, Türkiye

## Education

**Computer Science Engineering, Akdeniz University - Department of Engineering**

2019 – present  
Antalya, Türkiye

## Skills

**Object Oriented Programming**

Design Patterns (MVVM, Repository, MVC, VIPER etc.)

**Software Tools**

Git and Github

Xcode

Swift Package Manager

Swift Third Party Libraries (Realm, Siesta etc.)

**Programming Languages**

Swift (Adv.)

SwiftUI (Adv.)

C# (Adv.)

Java (Adv.)

**Soft Skills**

Communication

Collaboration

Punctual

Attention to Detail

Problem-Solving

Great Team Member

## Languages

**English**

Fluent

**Turkish**

Native Language

**German**

## Organizations

**Google Student Developers Club - Akdeniz University, R&D Team Member**

2022 – 2023  
Antalya, Türkiye
